MARUTHI YENUMULA

Java Full Stack Developer

Hyderabad, India | +91 84979 87514 | maruthiy310@gmail.com

github.com/maruthi-user | linkedin.com/in/maruthi-y-5512a4423 | github.com/maruthi-user/maruthi-portfolio

PROFESSIONAL SUMMARY

Java Full Stack Developer with 8+ months of hands-on experience at First Partner Consulting, building role-based business applications with Java 17, Spring Boot, React and SQL databases. Built the Task Management module of a company HRMS end to end (REST APIs, permission rules and a six-view React interface) and delivered frontend and API integration for the HRMS, a Budget Estimation System and an Inventory & BOM application. Also shipped three personal projects, including a Spring Boot and PostgreSQL marketplace with OTP and JWT authentication. MCA graduate (2025).

TECHNICAL SKILLS

Languages: Java 17, JavaScript (ES6+), SQL, Python (basic)

Backend: Spring Boot, Spring Security (JWT), Spring Data JPA (Specifications), Hibernate, REST APIs, Bean Validation, Flyway, Swagger/OpenAPI, Maven

Frontend: React.js, Next.js, Redux Toolkit / RTK Query, Tailwind CSS, Radix UI, Vite, HTML5, CSS3

Databases: PostgreSQL, MySQL, MongoDB

Cloud / DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, AWS (EC2, ELB, S3), Render, CI/CD

Testing / Tools: JUnit, Postman, Git, GitHub, VS Code

Practices: Agile/Scrum, role-based access control (RBAC), approval workflows, API-first development, dev/prod environment profiles

GenAI: LangChain, LLM API integration (Claude, DeepSeek, GLM), prompt engineering

EXPERIENCE

Software Developer Intern / Trainee — First Partner Consulting, Hyderabad Feb 2026 – Present

Agile sprints with backend, QA and product teams on internal and client-facing systems. Source code is in private company repositories.

Task Management module, HRMS — Backend and Frontend

Tech: Java 17, Spring Boot, Spring Security, Spring Data JPA (Specifications), REST APIs, React, RTK Query, Tailwind CSS

- Built the module end to end: 30+ REST endpoints for filtered and paged tasks, status changes, activity notes, duplicate, recurring tasks, board, workload, Excel export and a Main Task / Sub Task catalogue.
- Designed a six-state review workflow (Defined, In Progress, Executed, Reviewed, Re-submitted, Approved) with server-side authorization based on role, assignee, reviewer, approver and the reporting hierarchy, mirrored in the UI so it offers only permitted actions.
- Added field-level edit checks, dynamic JPA Specification filters backed by indexes, cursor-paginated Kanban columns and recurring-task generation with validation limits.
- Built Summary, List (inline editing), Board (drag and drop), Calendar, Gantt and Workload views with role-specific dashboards and a mobile layout; added task reports to the reporting engine.

HRMS — Human Resource Management System (Frontend and API integration)

Tech: React 19, Vite, Redux Toolkit / RTK Query, Tailwind CSS, Radix UI, Spring Boot REST APIs, Swagger/OpenAPI

- Built React screens for Leave and Comp-off, Attendance, Employee Advances, Claims, Daily Status Reports and the HR dashboard, integrated with Spring Boot REST APIs using their Swagger/OpenAPI contracts.
- Implemented role-based UI for six roles (Employee, Lead, Approver, HR, Admin, Super Admin): a permission map controls the apps, sidebar modules, tabs and actions each user sees, with Pending Approval queues, live count badges and My / Team / All views.
- Built shared components: a reusable data table with column reordering and saved layouts, generic filters, server-side pagination, Excel export with clear server error messages and a processing lock that prevents duplicate submits.
- Handled JWT session expiry (automatic logout and a session-expired modal on 401) and built the login and forgot-password screens and the profile password-change tab.

BES — Budget Estimation System (Client: Retail Manufacturer)

Tech: React.js, Tailwind CSS, Swagger REST APIs

- Built responsive React screens for service-wise budget estimation and payment tracking, with dynamic forms that change fields and sections based on the selected service type.
- Integrated the screens with existing REST APIs to retrieve, submit and refresh data; built reusable components, client-side validation and loading, success and error states.

Inventory & BOM Management

Tech: React.js, Tailwind CSS, REST APIs, Swagger/OpenAPI

- Built responsive React screens for inventory listing, stock entry and BOM workflows, integrated with REST APIs to retrieve and update inventory and BOM data.
- Implemented validated forms, reusable components and frontend logic that recalculates processing cost and estimated total cost as quantities and rates change.

PERSONAL PROJECTS

F2Home — Farmer-to-Customer Marketplace 2026

Code: github.com/maruthi-user/F2Home

Tech: Java 17, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, Flyway, React 19, Redux Toolkit / RTK Query, Vite, Docker, GitHub Actions

- Built a full-stack marketplace with separate experiences for farmers, customers and admins: marketplace, cart with minimum-order rules, order requests and a farmer sales dashboard.
- Implemented phone number + OTP login with JWT access/refresh tokens, a custom Spring Security filter chain and Bucket4j rate limiting on OTP endpoints.
- Modelled authentication and user data with Spring Data JPA and PostgreSQL under Flyway migrations; documented APIs with springdoc OpenAPI and covered behaviour with JUnit tests.
- Configured Spring profiles, Actuator health checks and GitHub Actions CI; Dockerised the API and set up deployment with Render and Neon PostgreSQL.

Arogya Mitra — Telugu Audio-First Health App 2026

Live: arogya-mitra-lime.vercel.app | **Code:** github.com/maruthi-user/arogya-mitra

Tech: HTML5, CSS3, JavaScript (ES6+), Web Speech API, localStorage, Node.js

- Built an accessible Telugu and English app that helps villagers find nearby doctors, clinics and pharmacies, with recorded voice prompts, Telugu voice search (te-IN) and one-tap calling.
- Added a symptom picker that routes danger signs to an emergency 108 screen, plus slot booking with a My Bookings list and medicine search by pharmacy.

Lotus UI — Interactive Animation Study 2026

Live: lotus-ui-fx6c.vercel.app | **Code:** github.com/maruthi-user/lotus-UI

Tech: JavaScript, SVG, Canvas, Vite, Tailwind CSS v4, Vercel

- Drew and animated a growing lotus with hand-written SVG and JavaScript, with a canvas particle layer; deployed as a static site on Vercel.

Developer Portfolio 2026

Code: github.com/maruthi-user/maruthi-portfolio

Tech: Next.js, React, Tailwind CSS v4, TypeScript

- Built a static portfolio with case studies for the HRMS and Task Management work, including interactive role-permission and workflow mock-ups built with sample data.

EDUCATION

Master of Computer Applications (MCA) — Mohan Babu University, Tirupati 2023 – 2025

Bachelor of Science in Computer Science — Acharya Nagarjuna University, Guntur 2020 – 2023
